SUMMARY

I am a motivated and enthusiastic Computer Science graduate with a specialization in Entire Computer Science (ECS), driven by a strong passion for technology and problem-solving. During my academic journey, I developed a solid foundation in programming, web development, and database management, which helped me build confidence in creating practical and innovative solutions. I have gained hands-on knowledge in Java, HTML, CSS, JavaScript, React.js, and MySQL, along with a good understanding of object-oriented programming concepts and modern web technologies. I enjoy learning new skills, exploring emerging technologies, and applying my knowledge to real-world challenges.

WORK EXPERIENCE

Trainee Developer- Java Full Stack

Kiran Academy, Pune

08/2025 – 02/2026

Karvenager, Pune

- Independently designed and developed a full-stack ride booking web application using Java, Spring Boot, Hibernate, MySQL, HTML, CSS, and JavaScript.
- Implemented REST APIs, JWT authentication, and database integration for secure and efficient application functionality.
- Developed features such as user login, ride booking, driver management, and admin panel.
- Performed backend development, frontend integration, testing, debugging, and application optimization independently.
- Managed complete project development lifecycle from requirement analysis to deployment and performance enhancement.

SKILLS

- Java
- Hibernate
- MySQL
- REST API
- Spring Boot
- HTML, CSS, JavaScript
- JDBC
- JWT Authentication
- Git & GitHub
- React.js

EDUCATION

Dr. Ganpatrao Deshmukh Mahavidyalaya, Sangola

B.Sc(ECS)

10/2022 – 10/2025

Sangole

PROJECTS

Project Name- Uber Full Stack

- Developed a ride booking web application using Java, Spring Boot, Hibernate, MySQL, HTML, CSS, JavaScript.
- Implemented JWT authentication, REST APIs, and database integration.
- Built features like user login, ride booking, driver management, and admin panel.
- Tools-Eclipse IDE, Visual Studio Code, Git, GitHub, Postman, Maven, MySQL Workbench

Project Name- Automated teller machine

- Collaborated with team members to design and develop an ATM system using Java and JDK, simulating real ATM operations.
- Contributed to implementing features such as PIN authentication, cash deposit, withdrawal, balance inquiry, and PIN change functionality.
- Worked with the team to apply Object-Oriented Programming (OOP) concepts and secure user authentication validation.
- Participated in debugging, testing, and optimizing application performance to ensure smooth functionality.
- Coordinated with team members using Git and GitHub for version control and project management.
- Tools & Technologies: Java, JDK, Eclipse IDE, IntelliJ IDEA, Git, GitHub.

RELEVANT SKILL

- Team Work
- Time Management
- Communication Skills
- Quick learner
